DESIGNER Elena Piccolboni

ELENA classe 1982, originaria di Verona. La sua formazione è di stampo artistico, tra liceo e accademie di belle arti. Si forma in design del prodotto, ama definirsi "Eterna curiosa e sperimentatrice". La passione per il disegno l'accompagna dalla tenera età, lasciando la fantasia a briglia sciolta nella ricerca di nuove espressioni creative.

Ama definirsi senza "stile definito", poiché nella sperimentazione va cercando sempre qualcosa di nuovo, da aggiungere al suo bagaglio creativo. Quando crea una wallpaper pensa ad una storia da raccontare, cercando di metterla in scena con le sue illustrazioni ed i colori, che scaturiscono dalle emozioni che sente quando progetta. Ogni illustrazione è nata su carta, il suo supporto preferito per creare lavori di design.

ELENA was born on 1982, her origins are from Verona. Her education is artistic, between high school and academies of fine arts. She trained in product design, likes to describe herself as "Eternally curious and experimental." Her passion for drawing has accompanied her since an early age, leaving her imagination unbridled in the search for new creative expressions.

She likes to define herself without a "defined style," since in experimentation she is always looking for something new to add to her creative baggage. When she creates a wallpaper she thinks of a story to tell, trying to stage it with his illustrations and colors, which spring from the emotions he feels when designing. Each illustration originated on paper, her favorite medium for creating design work.

Elle est née en 1982, originaire de Vérone. Sa formation est artistique, entre le lycée et les académies des beaux-arts. Elle a suivi une formation en conception de produits et aime se décrire comme une "éternelle curieuse et expérimentatrice". Sa passion pour le dessin l'accompagne depuis son plus jeune âge, laissant libre cours à son imagination dans la recherche de nouvelles expressions créatives.

Elle aime se décrire comme n'ayant pas de "style défini", car dans son expérimentation, elle est toujours à la recherche de quelque chose de nouveau à ajouter à son bagage créatif. Lorsqu'elle crée un papier peint, elle pense à une histoire à raconter, en essayant de la mettre en scène avec ses illustrations et ses couleurs, qui jaillissent des émotions qu'elle ressent lors de la conception. Chaque illustration est créée sur papier, son support préféré pour créer des œuvres de design.

WALLPAPER PERSONALIZZATA

Grazie all'ufficio di progettazione PINTDECOR è possibile realizzare un decoro 100% custom-made per esempio scegliendo un'immagine dalle grandi banche dati disponibili come Shutterstock.com.

Nel caso di acquisto da parte di Adria Art di una immagine da Shutterstock.com, verrà addebitato al cliente un costo a singola foto di 50,00 Euro di listino (IVA esclusa), nel caso di acquisto di immagini da altre banche dati, il costo sarà definito di volta in volta sulla base del codice foto scelto dal cliente finale.

Il cliente ci invierà il codice ID dell'immagine scelta, la relativa banca dati e le dimensioni della parete che vuole rivestire e riceverà entro pochi giorni il preventivo ed il render in scala dell'immagine scelta.

Qualora l'immagine non fosse in una definizione sufficiente per una stampa di qualità rispetto alle dimensioni richieste, il nostro ufficio grafico, vi proporrà un'immagine analoga alternativa ma con una maggiore definizione.

Per andare in produzione è tassativamente necessario il visto di accettazione del cliente sia sulla conferma d'ordine che sul render progettuale.

PAPIERS PEINTS PERSONNALISÉS

Grâce au Bureau d'Etudes PINTDECOR il est possible de réaliser un décor 100% sur mesure, par exemple en choisissant une image dans les grandes bases de données disponibles telles que Shutterstock.com.

Dans le cas où l'image sera choisie dans la base de données sur Shutterstock.com, un coût de 50,00 Euro par photo (prix public ht) sera facturé au client. Au contraire si l'image sera demandée sur d'autres bases de données, le coût sera défini et chiffré par rapport au projet selon la référence/code choisie par le client.

Le client nous envoie le code d'identification de l'image, la base de données correspondante et les dimensions du mur qu'il souhaite recouvrir.

En quelques jours il recevra le devis et le visuel à l'échelle de l'image choisie. Si elle n'est pas d'une définition suffisante pour une impression de qualité par rapport aux dimensions demandées, notre service graphique proposera une image similaire comme alternative, mais de plus grande définition.

Pour passer à la production, le bon accord du client est absolument nécessaire, tant sur la confirmation de la commande que sur le bon à tirer.

CUSTOMISED WALLPAPER

Thanks to the PINTDECOR design office, you can create a 100% custom-made items, for example by choosing an image from the available large databases, such as Shutterstock.com.

If the required image is chosen from the Shutterstock.com database, a cost of € 50,00 / per photo (public price VAT excluded) will be charged to the customer. On the contrary, if the image will be required on other databases, the cost will be defined and quoted according to the project as well as on the reference/code chosen by the customer.

The customer will send us the ID code of the desired image, the relevant database and the dimensions of the wall to cover and will receive the quotation and the scaled rendering of the chosen image within a few days.

If the image has not an adequate definition for a quality print compared to the required size, our Graphics Department will propose a similar image as an alternative, but with a higher definition.

An order will be passed into production only after receiving a written acceptance from the customer both on the order confirmation and on the rendering.

PAPELES PINTADOS PERSONALIZADOS

En caso de compra de imágenes en otras bases de datos, el coste será definido de vez en vez en base al código de la foto escogida por el cliente.

El cliente nos enviará el código identificativo de la imagen seleccionada, la relativa base de datos y las dimensiones de la pared que desea. En pocos días recibirá el presupuesto y el desarrollo gráfico en escala de la imagen escogida.

Si la imagen no tiene la definición suficiente para una impresión de calidad respecto a las dimensiones deseadas, nuestro departamento gráfico propondrá una imagen análoga alternativa, pero con mayor definición.

UTENSILI UTILI

Secchio con acqua - Rullo in tessuto acrilico a pelo corto - Rullino premi giunte in materiale plastico
Cutter con lama da 18 mm. - Livella - Matita - Metro - Riga e Spatola da tappezziere
Tavolo da tappezziere - Panno o spugna morbida - Colla per parati

1 Per una riuscita ottimale preparare la parete ricordandosi di smontare le placche delle prese di corrente, chiodi o altre sporgenze che potrebbero invalidare la buona riuscita del lavoro. Stuccare eventuali imperfezioni/fori del muro, carteggiando in modo che la superficie sia uniforme e asciutta, priva di residui di qualunque genere. Il muro o cartongesso devono essere rasati e lisci, si consiglia sempre di stendere una mano di fissativo acrilico per eliminare la polvere sul muro e far aggrappare meglio la colla.

2 Nel caso di montaggio su pannelli in legno utilizzare solo pannelli grezzi in mdf o truciolare; non è possibile il montaggio su pannelli di legno con pellicola melaminica o vetro.

3 Nel render progettuale sono presenti delle abbondanze sulle strisce, in particolare 10 cm. in altezza da suddividere in ugual misura tra sopra e la base del rotolo, e nel primo e ultimo telo dove, a seconda della larghezza del supporto da voi scelto per la stampa, troverete una uguale abbondanza a Sx e a Dx contrassegnate da una linea tratteggiata verticale. In fondo ad ogni rotolo infine è stampato il codice del prodotto e il numero progressivo dei diversi teli che compongono il disegno. Si segnala che, se non specificatamente richiesto, anche le abbondanze sono interamente stampate.

4 Procedere quindi con il rilevamento e tracciamento dell'area da rivestire con i rotoli di carta da parati, con l'ausilio di una livella, un metro e una matita, segnare i punti dove posizionare le strisce.

5 Inumidire e pulire il retro di ogni rotolo usando acqua pulita. Disporre a terra le strisce nell'ordine di applicazione, si ricorda che possono essere usate SOLO colle in pasta, la colla consigliata da Adria Art è la Adesilex MT32 della Mapei. La colla Adesilex MT32 NON va diluita in acqua e va stesa SOLO sul muro in modo omogeneo, utilizzando un rullo in tessuto acrilico a pelo corto. Incollare e montare un telo alla volta.

6 Posare la prima striscia sulla parete iniziando dalla parte superiore del muro, avendo cura di lasciare la stessa abbondanza di circa 5 cm. sia nella parte alta che terminale del rotolo; srotolare la striscia verso il basso seguendo i segni tracciati in precedenza con la matita sulla parete, verificare con l'ausilio della livella di aver applicato perfettamente in verticale la prima striscia, se necessario, scostare dal muro il telo e riallineare nuovamente.

7 Aiutatevi per meglio stendere il telo sul muro con la spatola da tappezziere, avendo cura di NON rovinare il parato. Per evitare bolle d'aria o altre imperfezioni, far aderire bene la carta alla parete utilizzando un rullo o una spugna asciutta per esercitare pressione dall'interno verso l'esterno. Ripetere l'operazione per tutti gli altri teli. Si ricorda che i teli vanno fissati accostati l'uno all'altro, senza sormonto, facendo attenzione che combacino tra loro perfettamente tutti i dettagli.

8 Eseguendo il montaggio come da istruzioni, avrete circa 5 cm di abbondanza sia sulla parte estrema superiore che inferiore, ed anche una abbondanza alle due estremità laterali del primo e ultimo telo.

Rifilare con un cutter le parti di carta in eccesso aiutandovi con una riga da tappezziere o una spatola rigida. A lavoro appena completato, prima che asciughi, pulire delicatamente la carta da parati da residui di colla, usando una spugna appena bagnata morbida, NON abrasiva. Non utilizzare altri materiali, perché potrebbero danneggiare la carta da parati.

USEFUL TOOLS

Bucket with water - Short-haired acrylic fabric roller - Splicing roller made of plastic material
Cutter with 18 mm blade - Spirit level - Pencil - Ruler and upholsterer's spatula
Upholsterer's table - Cloth or soft sponge - Wallpaper glue

1 For best results, you will need to prepare the wall and to remove socket plates, nails or other ledges that could affect the goods result of the work. Then fill the imperfections/holes in the wall with plaster and sand them so that the surface is even, dry and free of any residue. The wall or plasterboard must be leveled and smooth: it is always suggested to apply an acrylic fixative coat in order to remove some dust on the wall and to make the glue adhere better.

2 In the case of an installation on some wooden panels, use only raw Mdf or chipboard panels; it is not possible an installation on wooden panels with melamine film or glass.

3 In the design rendering there is a leeway on the strips, in particular 10cm. in height to be equally shared between the top and the bottom of the roll as well as in the first and last strip where you will find an equal leeway on the left and right marked by a vertical dotted line depending on the wallpaper backing width you chose. The product code and the progressive number of the different strips are printed at each roll bottom. Please note that all leeway are fully printed, unless specifically requested.

4 Proceed with check and tracking of the area to be covered with the wallpaper rolls by using a spirit level, a tape measure and a pencil, mark the points where the strips should be placed.

5 Dampen and clean the back of each strip using clean water. Put the strips on the floor in the order of application and remember that ONLY paste glue can be used: the glue recommended by Adria Art is Adesilex MT32 by Mapei. Adesilex MT32 glue should NOT be diluted in water and should be spread evenly ONLY on the wall by using a short-haired acrylic fabric roller. Paste and install one strip at a time.

6 Install the first strip on the wall by starting at the top of the wall and take care to leave the same leeway of about 5cm both at the top and at the end of the strip; unroll the strip downwards, following the marks previously traced with the pencil on the wall, check by using the spirit level that you have applied the first strip perfectly vertically and if necessary, move the strip away from the wall and line it up again.

7 Help yourself to better apply the strip on the wall with the wallpaper spatula by taking care NOT to damage the wallpaper. In order to avoid air bubbles or other imperfections, adhere the wallpaper well to the wall using a roller or dry sponge to apply pressure from the inside out. Repeat the operation for all the other strips. Please remember that the strips should be fixed side by side, without overlapping them and by taking care that all details fit perfectly together.

8 By carrying out the installation as instructed, you will have approximately 5cm of leeway on both the upper and lower ends and also another one at the two side ends of the first and last strip.

Trim the excess wallpaper with a cutter, using an upholsterer's ruler or a stiff spatula. Once the work is completed and before it dries, clean gently the wallpaper of any glue residual with a soft and NON-abrasive wet sponge. Do not use other materials, as they may damage the wallpaper.

OUTILS UTILES

Seau avec de l'eau - Rouleau en tissu acrylique à poils courts -Rouleau pour presser les joints en plastique
Cutter avec lame de 18 mm. - Niveau - Crayon - Ruban à mesurer - Spatule de règle et de rembourrage
Table de tapissier - Chiffon doux ou éponge - Colle pour papier peint

1 Pour obtenir les meilleurs résultats, il faut préparer le mur et d'enlever les douilles, les clous et autres rebords qui pourraient nuire à la qualité du travail. Ensuite, remplissez les imperfections/trous du mur avec du plâtre et poncez-les de manière à ce que la surface soit uniforme, sèche et sans résidus. Le mur ou le placoplâtre doit être nivelé et lissé : il est toujours conseillé d'appliquer une couche de fixateur acrylique afin d'éliminer la poussière sur le mur et de permettre à la colle d'adhérer plus facilement.

2 Dans le cas d'une installation sur des panneaux de bois, il faut utiliser uniquement des panneaux en Mdf ou d'aggloméré bruts ; il n'est pas possible de réaliser une installation sur des panneaux en bois avec un feuille de mélamine ou du verre.

3 Dans le visuel du décor, il y a une marge sur les bandes, notamment 10cm. de hauteur à partager à parts égales entre le haut et le bas du lé ainsi que dans le premier et le dernier lé où vous trouverez une marge égale à gauche et à droite marqués d'une ligne pointillée verticale en fonction de la largeur du dos du papier peint choisi. La référence produit et le numéro progressif des différents lés sont imprimés au bas de chaque rouleau. Veuillez noter que toutes les marges sont entièrement imprimées, sauf demande spécifique.

4 Procédez à la vérification et suivi de la zone à recouvrir avec les lés de papier peint en utilisant un niveau à bulle, un mètre ruban et un crayon et donc marquez les points où les lés doivent être placés.

5 Humidifiez et nettoyez le dos de chaque bande à l'eau claire. Posez les bandes sur le sol dans l'ordre d'application et rappelez-vous que uniquement la colle en pâte peut être utilisée. La colle recommandé par Adria Art est l'Adesilex MT32 de Mapei.

La colle Adesilex MT32 ne doit PAS être diluée dans l'eau et doit être placée uniformément et UNIQUEMENT sur le mur à l'aide d'un rouleau en tissu acrylique à poils courts. Collez et installez une bande à la fois.

6 Posez le premier lé sur le mur en commençant par la hauteur et en prenant soin de laisser la même marge d'environ 5cm dans la partie en haut et à la fin du lé ; déroulez la bande vers le bas en suivant les marques préalablement tracées au crayon sur le mur, vérifiez à l'aide du niveau à bulle que vous avez appliqué le premier lé parfaitement à la verticale et si nécessaire, éloignez-le du mur et alignez-le à nouveau.

7 Aidez-vous à mieux appliquer le lé sur le mur avec la spatule de tapissier en prenant soin de ne PAS endommager le papier peint. Afin d'éviter les bulles d'air ou autres imperfections, collez bien le papier peint au mur à l'aide d'un rouleau ou d'une éponge sèche en faisant une pression de l'intérieur vers l'extérieur. Répétez l'opération pour tous les autres bandes.

N'oubliez pas que les bandes seront à fixer côte à côte, sans se chevaucher et en s'assurant que tous les détails s'emboîtent parfaitement.

8 Si la pose sera réalisée en suivant les instructions ci-dessus, vous aurez une marge d'environ 5cm soit dans la partie supérieure et inférieure et également une abondance aux deux extrémités latérales du premier et du dernier lé.

Coupez la partie excédentaire de papier peint avec un cutter et à l'aide d'une règle de tapissier ou d'une spatule rigide. Une fois le travail est terminé et avant qu'il ne sèche, nettoyez délicatement le papier peint de tous résidus de colle avec une éponge douce (NON abrasive) et humide. N'utilisez pas d'autres matériaux car ils pourraient endommager le papier peint.

HERRAMIENTAS ÚTILES

Cubo con agua - Rodillo de tela acrílica de pelo corto - Rodillo para prensar en material plástico
Cortador con hoja de 18 mm. - Nivel de burbuja - Lápiz - Metro - Regla y espátula de tapicero
Mesa de tapicero -Tela o esponja suave - Pegamento para papel tapiz

1 Para obtener un óptimo resultado, prepare la pared recordando quitar las tapas de los tomacorrientes, clavos u otras protuberancias que puedan invalidar el éxito de la obra. Rellenar con lechada las imperfecciones/agujeros de la pared, lijando para que la superficie quede uniforme y seca, libre de cualquier tipo de residuos. La pared/cartón yeso debe estar recortada y lisa, es recomendable extender siempre una mano de fijador acrílico para eliminar el polvo de la pared y optimizar la adherencia de la cola.

2 En caso de montaje sobre paneles de madera, utilice únicamente paneles de mdf o aglomerado; no es posible el montaje sobre paneles de madera con lámina de melamina o vidrio.

3 Las láminas del proyecto gráfico incluyen excedencias, en concreto 10 cm. de altura a dividir en partes iguales entre la parte superior y la base del rollo, y en la primera y última lámina donde, según el ancho del soporte que haya elegido para imprimir, encontrará una abundancia igual a la izquierda y a la derecha marcadas por una línea discontinua vertical. Finalmente, en la parte inferior de cada rollo se imprime el código del producto y el número progresivo de las láminas que componen el diseño. Cabe señalar que a menos que se solicite específicamente, las excedencias también se imprimen en su totalidad.

4 Luego proceda con la toma de las medidas y trazado del área a cubrir con los rollos de papel pintado, con la ayuda de un nivel, un metro y un lápiz, marque los puntos donde colocar las láminas.

5 Humedezca y limpie la parte posterior de cada lámina con agua limpia. Dispóngalas en el suelo en el orden que deben ser aplicadas, recuerde que SÓLO se pueden utilizar pegamentos en pasta, la cola recomendada por Adria Art es la Adesilex MT32 de Mapei.

La cola Adesilex MT32 NO debe diluirse en agua y SOLAMENTE debe extenderse de manera uniforme sobre la pared utilizando un rodillo de tela acrílica de pelo corto. Pegue y monte una lámina a la vez.

6 Coloque la primera lámina en la pared comenzando desde la parte superior de la pared, teniendo cuidado de dejar el mismo exceso de unos 5 cm. tanto en la parte superior como terminal del rollo; desenrolle la tira hacia abajo siguiendo las marcas dibujadas previamente con un lápiz en la pared, compruebe con la ayuda de un nivel de burbuja que ha aplicado la primera tira perfectamente en vertical, si es necesario, aleje la lámina de la pared y vuelva a alinear.

7 Para extender mejor la lámina sobre la pared utilice una espátula de tapicero, preste atención a NO dañar el papel pintado. Para evitar burbujas de aire u otras imperfecciones, adhiera el papel firmemente a la pared con un rodillo o una esponja seca para hacer presión desde adentro hacia afuera. Repita la operación con todas las demás láminas. Recuerde que las mismas deben ser fijadas una al lado de la otra sin superponerse, asegurándose de que todos los detalles encajen perfectamente.

8 Realizando el montaje como indicado, le sobrarán unos 5 cm tanto en el extremo superior como en el inferior, y además en los dos extremos laterales de la primera y última lámina.

recorte el exceso de papel con un cortador utilizando una regla para empapelar o una espátula rígida. Cuando concluya el trabajo, antes que se seque la cola, limpie suavemente con una esponja NO abrasiva recién humedecida el papel pintado eliminando los residuos de pegamento. No utilice otros materiales ya que pueden dañar el papel pintado.

Di seguito troverete tutte le immagini delle nostre carte da parati riepilogate in miniature fotografiche. Tutte le immagini hanno le proporzioni di una parete di 5 metri di larghezza per 3,10 metri di altezza e possono essere ridotte o ingrandite per adeguarsi alla misura della vostra parete.
Per coprire pareti con misure o proporzioni particolari, potrebbe essere necessario utilizzare solo una parte dell'immagine scelta. Per questo, accanto ad ogni miniatura, troverete due linee grafiche divisorie che vi aiuteranno nel taglio dell'immagine: basterà comunicarci le misure scelte e avrete la sezione di immagine che vi serve.

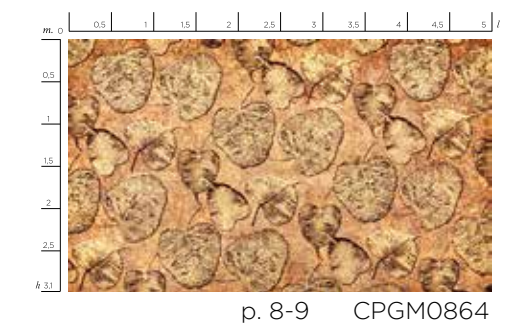

All our wallpapers images are summarized below in the form of photographic miniatures. All images have the proportions of a 5 meters wide by 3.10 meters high wall and can be reduced or enlarged to suit the wall size. In order to cover walls of particular dimensions or proportions, it may be necessary to use only part of the chosen image. For this reason we've drawn two graphic partition lines next to each miniatures to help you cut out the image: you should just to inform us on the sizes chosen to obtain the desired part of the image.

Les images de tous nos papiers peints sont bien résumées ci-dessous sous forme de miniatures photographiques. Toutes les images ont les proportions d'un mur de 5 mètres de large par 3,10 mètres de hauteur et peuvent être réduites ou agrandies pour s'adapter à la taille de votre mur. Pour couvrir des murs de dimensions ou de proportions particulières, il peut être nécessaire de n'utiliser qu'une partie de l'image choisie. Pour cela, à côté de chaque miniatures, on a tracé deux lignes de séparation graphique qui vous aideront à découper l'image : il vous suffit de nous indiquer les mesures choisies pour obtenir la partie de l'image dont vous souhaitez.

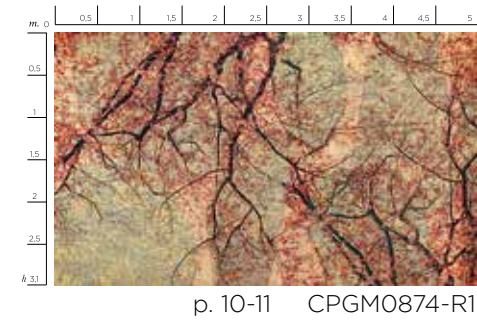

A continuación encontrarás todas las imágenes de nuestros papeles pintados agrupadas en miniaturas fotográficas. Todas las imágenes tienen la proporción de una pared de 5 m de ancho por 3,10 m de altura y se pueden reducir o ampliar para adaptarlas al tamaño de tu pared. Para revestir paredes con medidas o proporciones particulares se puede utilizar sólo una parte de la imagen elegida. Para ello, junto a cada miniatura se han diseñado dos líneas gráficas divisorias que te ayudarán a recortar la imagen. Es suficiente indicarnos las medidas escogidas para obtener la sección deseada.
